Education

University of California Davis

Expected Graduation: Jun 2027

Bachelor of Science in Computer Science and Bachelor of Arts Cinema & Digital Media

Affiliations: College Track Scholar, Computer Science Peer Advisor, ESA Scholar, HSF Scholar, Letters and Science Ambassador

Summary

Driven undergraduate student with extensive hands-on game development experience, demonstrated through leading five successful Unity projects with proficiency in C#/ C++ and React. Skilled in version control, Linux environments, and agile-based workflows, complemented by strong team collaboration. Eager to expand my software engineering expertise while contributing to innovative gaming and web development projects.

Experience

Overwatch Build Engineer Intern

Jun 2026 - Sep 2026

Blizzard | Irvine, CA

- Built a cross-application URI protocol in C# that serialized playtest configurations into shareable links, enabling automated playtest launch workflows across machines.
- Extended REST APIs and database-backed services to create, persist, and retrieve playtest configurations used by internal testing tools.
- Added React-based features to the Overwatch build management portal, integrating playtest launch actions and branch-aware build selection workflows.
- Improved internal developer and QA tooling by automating repetitive build and playtest setup tasks.

VP of Infrastructure

Sep 2025 - Jun 2026

Swift Coding Club UCD | Davis, CA

- Managed and coordinated a team of six developers responsible for maintaining shared codebases, tools, and repositories to spearhead iOS app publishing among our 2025 developer cohort.

Student Programmer

May 2022 - Present

Gameheads | Oakland, CA

- Designed, developed, and published five video games, effectively pitching concepts to industry professionals, communicating progress in SCRUM, and orchestrating SMART sprints to ensure timely delivery.
-

Project Experience

Spree | Co-op Alternate Control (Shopping Cart) Racing Game

2025

Lead Programmer

Gameheads | Oakland, CA

- Engineered core gameplay systems—including AI drivers, race flow, and modular item mechanics—ensuring balanced, scalable, and engaging player experiences while leading technical direction for the team

Apartment 510 | VR Escape Room

2024

Lead Programmer and Level Design

Gameheads | Oakland, CA

- Engineered and integrated new script functionality using the Unity XR Interaction Framework, aligning with the game's vision to create engaging and unique puzzle mechanics.
 - Optimized game performance by diagnosing bottlenecks with the Unity Profiler, successfully boosting headset framerate to a stable 90 FPS. Further enhanced efficiency by implementing occlusion culling and baked lighting, reducing rendering overhead and reducing overall player motion sickness caused by lag.
-

Skill Sets

Productivity Software:

Figma | Trello | Google Slides | MS Excel | Jira

Technical:

SwiftUI | C++ | C# | C | Python | .Net Apps | Valgrind | React | GDB Debugger | Unity | Git | Makefile
